

DCU 151 Add-On Packs

Pro & Guardian

The DCU 151 twin shower is the most popular unit in our decontamination range. It is compact in size at only 4.6m in length, but with two showers it can accommodate up to 8 operatives on site. We now offer two additional packs which can be added to the standard DCU 151 unit, either together or individually.

Pro Pack: A reconfiguration of the original DCU 151 unit, with added features to improve the working environment and make things easier.

Guardian Pack: This will give the highest level of security and safety for your employees, contractors and visitors.
